HISTORIC AMERICAN ENGINEERING RECORD

ROGERS LOCOMOTIVE AND MACHINE WORKS:
FITTING SHOP

HAER No. NJ-3-B

HAER
NJ,
16-PAT,
20-B-

DATE: 1881

LOCATION: Spruce and Market Streets
Paterson, New Jersey

DESIGNED BY: Unknown

OWNERS: Consolidated Novelty Company

SIGNIFICANCE: This Fitting Shop was constructed as part of a modernization project undertaken in 1881 by the Rogers Locomotive and Machine Works. All the firm's land on the east side of Spruce Street had been levelled, and buildings better suited to their needs constructed. These included a large, almost square building three stories high, the large interior spaces of which could accomodate the large machines made by the Rogers Works.
